Managed Security

In today's ever-evolving cybersecurity landscape, it's more important than ever to have a robust managed security solution in place. With our cybersecurity solution, you can rest assured that your business is protected from a wide range of threats, including malware, ransomware, phishing attacks, and data breaches.

Challenge

Security threats can cause significant losses for businesses, due to the many complex and challenging issues that companies face. Some of the most common security challenges that businesses face include:

- 24/7 SecOps is expensive and difficult to maintain
- High alert volume leads to alert fatigue and high
- Cybersecurity talent difficult to find and retain
- Ineffective/non-existent SecOps processes and procedures

Our Service

Our Approach →	Consulting & Advisory	Managed Security	Professional Services

Our Services →	Endpoint Protection	MDR Services	Cloud Security	SOC (Security Operation Center)
	NGAV	24/7 Expert Management	Cloud Security Posture Management (CSPM)	24/7 Monitoring
	EDR	Monitoring & Response	Cloud Infrastructure Entitlement Management (CIEM)	Threat Detection, Analysis, and Response
	XDR		Cloud Workload Protection (CWP)	

Our Core Team →	DevOps Engineer	Solution Architect	Technical Account Manager	Cloud Security Engineer	Security Analyst

Platform →	Workstations	Servers	Workloads	Container

Our Approach

Consulting & Advisory
Talk to our expert consultants to provide you with cybersecurity solutions to protect your business from hidden cyber threats

Professional Services
Let our experienced technical team help you implement your organization's system, network, and application security plans

Managed Services
Spare yourself from infrastructure & security concerns, and unlock your full business potential with our expert cybersecurity services

Our Managed Security

Endpoint Protection

Let our expert team implement comprehensive threat protection across all endpoints, such as computers, laptops, and mobile devices.

NGAV (Next Generation Anti Virus)	EDR (Endpoint Detection & Response)	XDR (Extended Detection & Response)
Addressing the latest cyber security threat scenarios by leveraging machine learning and behavioral analysis.	Detecting, investigating, and responding to cyber threats at the endpoint	Providing a more comprehensive and integrated view of security data across the IT stack

## Managed Detection and Response (MDR)

Let our experts monitor and analyze your environment 24/7, promptly identifying and neutralizing threats. Bolster your cybersecurity strategy with proactive threat hunting and rapid incident response.

Managed Threat Hunting

Our expert team will proactively monitor, analyze, and detect potential threats and vulnerabilities within your organization's network or systems using advanced threat intelligence, analytical tools, and methodologies.

Incident Response

Our expert team is ready and responsive to detect, respond, and recover your business from cyberattacks, thus reducing the impact of breaches, minimizing downtime, and safeguarding your critical digital assets.
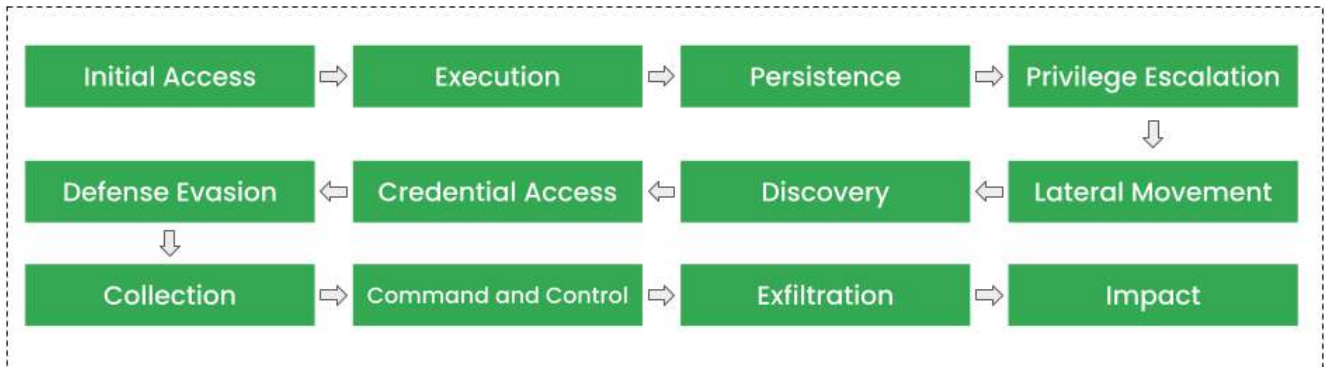

Actor / User

Firewall/WAF

MDR (Managed Detection and Response)

1. Cybersecurity Plan
2. Managed Threat Hunting
3. Incident Response
4. Vulnerability Management
5. IT Security Consulting (Cloud, and Hybrid Cloud)
6. Remediation
7. Security Monitoring 24/7

MDR service details

Attack Phase
Meet the **1-10-60** rule

Detect in 1 min, investigate in 10 min, respond in 60 min

Attack Phase:

Initial Access ⇨	Execution ⇨	Persistence ⇨	Privilege Escalation
Defense Evasion ⇦	Credential Access ⇦	Discovery ⇦	Lateral Movement
Collection ⇨	Command and Control ⇨	Exfiltration ⇨	Impact

Cloud Security

Our expert team offers high-level cloud security services to protect your business infrastructure, data, and applications from cyber threats and manage your complex cloud environment to stay protected from security risk breaches

Cloud Intelligence & Threat Hunting

Cloud Network Security & Threat Prevention

AWS

Google Cloud

Cloud Security

Cloud Security Posture Management (CSPM)

Cloud Workload Protection (CWP) Containers & Serverless

Azure

Huawei Cloud

Cloud Infrastructure Entitlement Management (CIEM)
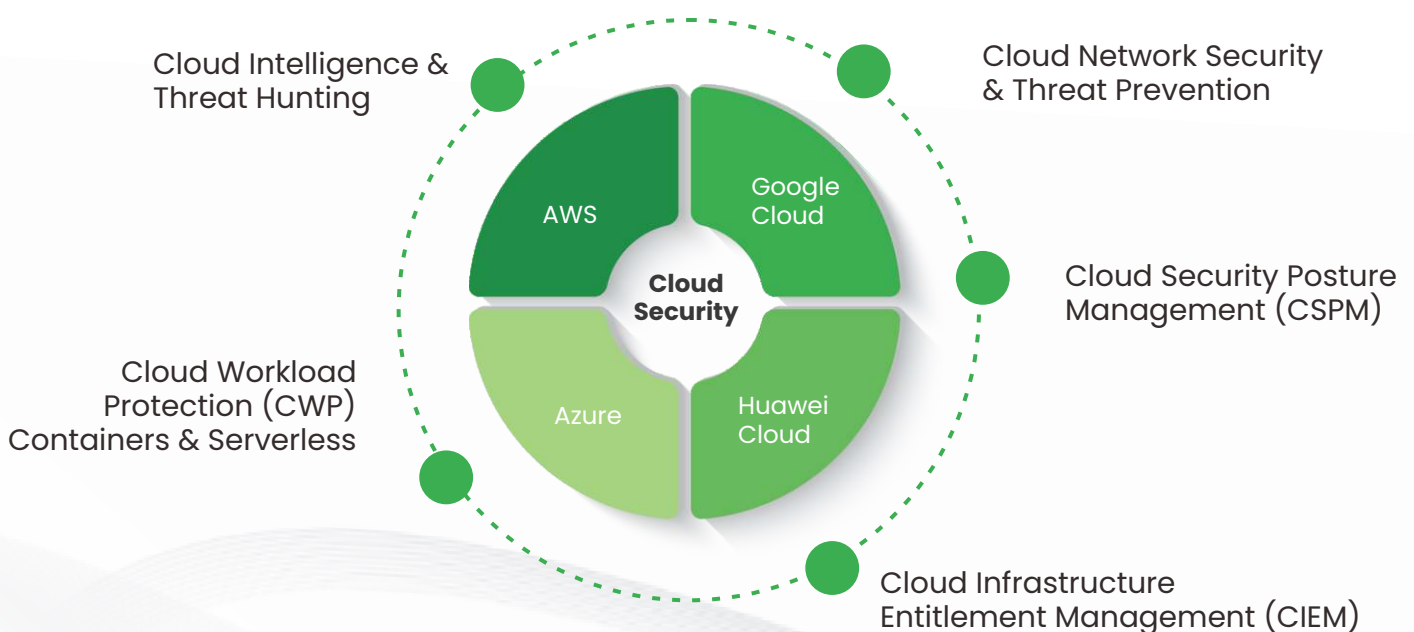

Cloud Intelligence and Threat Hunting (CI&TH)

Our service will combine the expertise of our security team and leverage technology to actively hunt for, detect, and investigate threats in the cloud.

Cloud Network Security (CNS) and Threat Prevention (TP)

Our team of experts will implement a comprehensive set of strategies and best practices to protect cloud infrastructure, networks, and data from unauthorized access, modification, and disruption.

Cloud Workload Protection (CWP)

Our service provides organizations with comprehensive security protection for all cloud workloads, including virtual machines, containers, and serverless functions.

Cloud Security Posture Management (CSPM)

Our expert team will identify and recover security risks before they cause damage by providing visibility into cloud infrastructure, configuration, and activity. This will result in companies having a reliable cloud security posture.

Cloud Infrastructure Entitlement Management (CIEM)

Our expert team will assist you in identifying, managing, and controlling your cloud resources. This is to ensure that only authorized users have access to your cloud resources.

Security Operation Center (SOC)

Our team of experts will use a combination of technology and human expertise to monitor, detect, and respond to cybersecurity events in real-time. This will help us to manage security risks and improve compliance with security regulations.

elitery
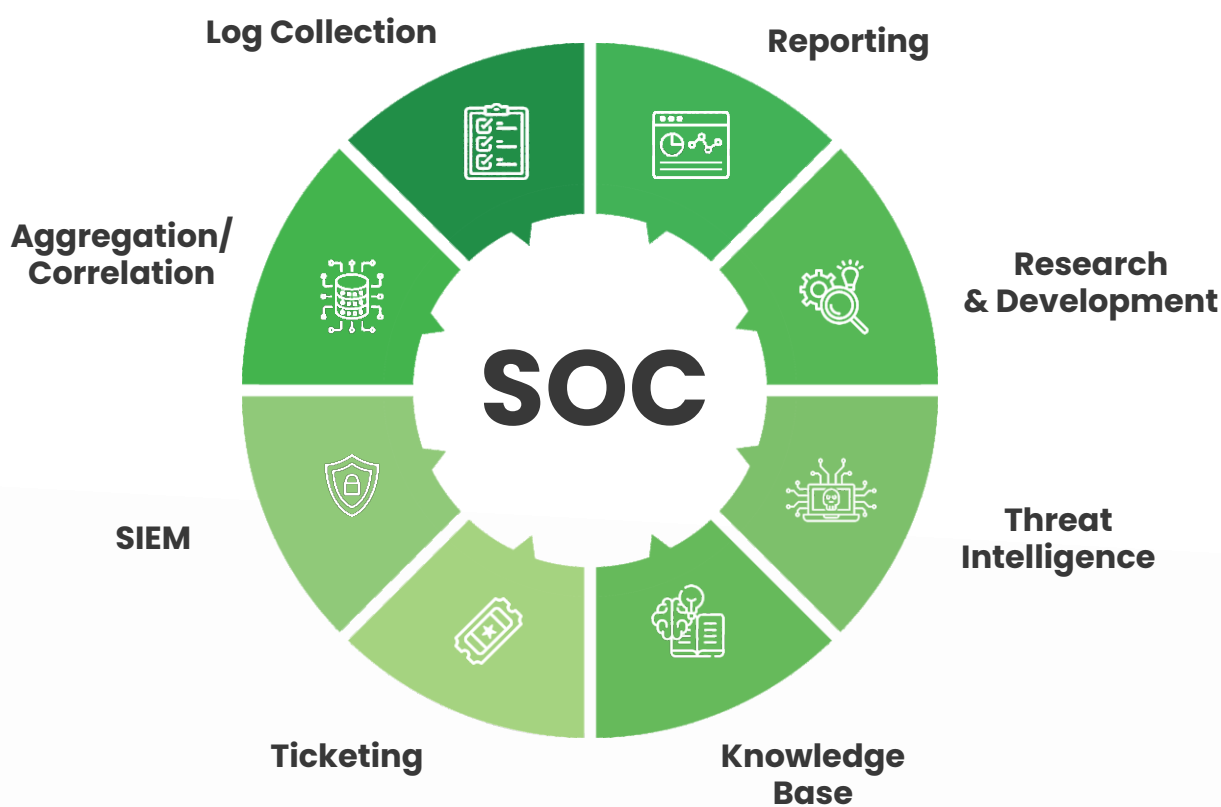

Why choose us?

Operational Peace of Mind
24x7x365 responsiveness - consult with our analysts via chat with an

Detect and disrupt hidden advanced attacks
Hunts relentlessly to intercept the stealthiest and most sophisticated attacks: the 1% of the 1% of threats that go undetected.

Hunting advanced threats at speed and scale
Our team of security experts masters advanced threat hunting with

Tailored approach
Elitery partners with you to develop a plan that takes into consideration your operational needs, as well as existing investments and resources, ensuring a thorough investigation and a customized remediation action plan.with an expert, email, and phone

Speed and efficacy
Elitery experts' skills and experience, combined with proven methodology and technology, allow the team to respond and contain incidents faster and more efficiently. The result: fewer hours incurred, less business interruption, and lower costs to you.

Intelligence-led investigation
Helps identify adversaries present in the environment, enabling the IR (Incident Response) team to quickly and efficiently contain the incident.

Security Monitoring
- Security Event Management
- Event Correlation
- Security Intelligence
- Threat Management

Vulnerability Management
- Vulnerability Assessment and Remediation
- Vulnerability Scanning
- Threat Intelligence

Network Security/Asset Inventory

Support
- 24/7 Monitoring

Rp 30.000.000,
per month
Include up to 5 network devices to monitor

Elitery has successfully implemented a cybersecurity solution in one of the Ministries in Indonesia and protects critical applications accessed by all Indonesian citizens.

The Challenge

- Lack of antivirus on all compute engines and container
- No endpoint protection to detect activities or threat patterns at the endpoint (server)
- No threat hunting to analyze cyber attacks that have breached security defenses
- No threat intelligence to know cyber threats that try to enter the company network
- No IT security team with experience in detecting and responding to threats

The Solution

Elitery provides a comprehensive endpoint protection and managed detection and response (MDR) solution. The solution includes the following capabilities

- **Proactive threat hunting**
  Elitery's MDR team uses advanced analytics and machine learning to proactively hunt for threats on a 24/7 basis.
- **Automated threat intelligence**
  MDR solution leverages threat intelligence to provide real-time insights into the latest threats.
- **Security monitoring**
  Elitery's MDR solution continuously monitors endpoints for suspicious activity.
- **Incident response**
  Elitery's MDR team is available 24/7 to respond to security incidents
- **Threat pattern identification**
  Elitery's MDR team uses advanced analytics to identify threat patterns and trends.
- **IT security consulting**
  Elitery's MDR team provides IT security consulting services to help organizations improve their security posture.

The Result

Elitery provides sophisticated security solutions for the customer and gives them peace of mind. Through our solution, the customer is able to improve efficiency and speed in customer service operations, as every endpoint and data is well-protected. This aligns with the customer's mission to maintain the security perimeter from the dangers of cyber threats that are common in the government sector.
